- Food Colouring
- Textile Industry

Reduran® Special

Special Hand Cleaner for the Removal of Stubborn Dyestuffs

- Reduran® Special is a slightly alkaline, solvent - free and preservative - free special hand cleanser used for removing contamination caused by dyestuffs.
- Reduran® Special can be used for removing dyestuffs which are reducible within the alkaline range, such as aniline dyes, azo dyes, printing & copying inks, fruit & vegetable colourants.
- Contains patented scrubbing agent ASTOPAN® (refined walnut shell powder) which enhances the efficacy of the cleansing system as it removes heavy duty contamination

REDURAN® SPECIAL 1000ml Softbottle

REDURAN® SPECIAL 100ml Tube

REDURAN® SPECIAL Starter Pack

#30153

#28325150

#29301504

Features

Cleansing system based on natural oil (INCI name: RICINUS COMMUNIS) & surfactants

Contains reducing agent

No water added

Contains bio-degradable surfactants and walnut shell scrubbers

Benefits

Outstanding cleansing power where dyestuff is difficult to remove.

Reducible dyestuffs are converted into their uncoloured form and can then be washed off the skin.

Effective and economical cleansing with just small quantities of the cleanser needed

Does not pollute the environment, and does not block drains and pipes
