1000ml Softbottle with SVO dispenser

100ml Tube

StokoDerm®

- StokoDerm® is a skin protection cream that helps to maintain healthy skin when working with both oil-based and water-based substances, such as carbon black, dust from castings, waste oil, adhesives containing solvents, various organic solvents etc.
- Effective when working with various UV lacquers for CD production, UV lacquers for urethane acrylate and UV paper lacquers for printing.
- StokoDerm's oil-in-water type emulsion allows users to switch from oil-based to water-based applications
- Silicone free, with excellent skin conditioning properties - is easily absorbed into the skin.
- Up to 1000 applications per Softbottle.
