

STOKODERM®

**Skin protection against changing workplace substances.
Contains skin protectant EUCORIOLO®.**

Description

Thanks to the combination of the emulsion base (oil-in-water) with a tanning agent (EUCORIOLO®) and a film former, STOKODERM® provides protection against both water-insoluble and water-soluble workplace substances.

Areas of Use

Changing contact with water-based substances and substances not mixed with water. Also for protection against UV lacquers (CD production, urethane-acrylate-based UV lacquers, UV paper varnishes used in printing processes).

Instructions for Use

Wash and dry the skin thoroughly before each application of STOKODERM®. Then carefully rub STOKODERM® on to the areas of skin at risk, including between the fingers and on the fingernails. STOKODERM® should always be used before starting work and after any lengthy breaks.

NB: Using skin care products does not release you from your duty to take the prescribed protective measures.

Features and Benefits

Product Features	Benefits
combined protective action when working with oily and water-based substances	▶ can be used in many areas of work
contains the skin protectant EUCORIOLO®	▶ protects the skin when working with water-based substances
oil-in-water emulsion	▶ high level of protection against oily workplace substances ▶ superior absorption properties
contains substances to care for your skin	▶ helps to keep stressed skin healthy
high-quality ingredients	▶ very good skin compatibility
no adverse effects when painting surfaces ¹	▶ can therefore be used on the skin in a wide range of production processes

¹ Test results of German carmakers

Product Description

White, perfumed, silicone-free lotion.
Emulsion type: oil-in-water.

Qualitative Composition*

AQUA (WATER), ETHYLHEXYL STEARATE, GLYCERYL STEARATE SE, GLYCERIN, CETEARYL ALCOHOL, SODIUM BISCHLOROPHENYL SULFAMINE, ISOPROPYL PALMITATE, GLYCOL DISTEARATE, XANTHAN GUM, CETEARETH-6, PHENOXYETHANOL, METHYLPARABEN, ETHYLPARABEN, PROPYLPARABEN, BUTYLPARABEN, ISOBUTYLPARABEN, CETEARETH-25, PARFUM (FRAGRANCE)

796

* The ingredient declarations used are in compliance with the International Nomenclature Cosmetic Ingredients (INCI).

Testing the Protective Action

The protective action of STOKODERM against the alternating effect of changing workplace substances has been confirmed using modern skin-physiological test methods. In the tandem repeated irritation test (TRIT) based on the repetitive occlusive irritation test (ROIT), Wigger-Alberti et al., Jena (2001), were able to demonstrate the protective action using the standard noxae sodium lauryl sulphate (surfactants/detergents) and toluene (solvents).

The protectant's efficacy against individual workplace substances, such as sodium lauryl sulphate and toluene, was demonstrated by Frosch et al. in the repetitive irritation test (RIT) as early as 1993.

The protective action against the UV lacquers mentioned has been confirmed in the leather cloth test (test model of Stockhausen GmbH, Krefeld, unpublished) and in practical use.

Skin Compatibility Tests

STOKODERM® is proven to have very good skin compatibility properties in human-experimental tests and in practical use.

A skin compatibility expert report prepared by the Department of Dermatology, Clinic Krefeld, Germany, is available.

Statutory Regulations

STOKODERM® is governed by the Ordinance Regulating Cosmetics, the Cosmetic Directives of the EC, and is not subject to the Chemicals Act or the Ordinance Regulating Hazardous Substances.

Safety Data Sheet

An EC safety data sheet containing additional product information is available for STOKODERM®.

Quality Assurance

All of our products meet the bacterial purity standards as they apply to medicines for external use (as defined by PhEur).

< 100 reproducible germs / g product.

Verification tests in this respect are a regular feature of our quality assurance procedures.

Shelf Life

STOKODERM® can be stored in a closed container at room temperature for at least 30 months.

First Aid

In the event of accidental eye contact with the product, rinse out using water. Consult a doctor if any burning sensation persists.

Additional Information

Safety data sheets, expert reports and bibliographies are available upon application.

Packaging Sizes

100 ml tube
1,000 ml soft bottle*

* for dispensing from the STOKO VARIO® dispensing system

Please note that for reasons of trademark protection, only soft bottles from the STOKO® Programme may be used in these dispensers.
